| C Motive Power | | |
| March 1957 Dobrota | vorski H.E.S Hydroelectric power station | |
| | | |
| | V (2) | 25X1 |
| General remarks | | |
| It is a new p | power station undergoing completion. It was built about 14 | |
| kilometers from In | yov, which is on the Bug River. The power station exploits | |
| the water of this | river by means of a high-pressure canal. The work was begun | l. |
| in 1956; the proje | ect is a grandoise one and there were many victims among the | |
| workers. Several | engineers were imprisoned in Siberia, having been accused | |
| of fraudulent negl | ligence or sabotage. | |
| Capacity | | |
| There is no | information concerning the energy which this power station | |
| will produce. As | of March 1957, eight generators, five of which are already | |
| in operation, were | e installed. It is not known what the total number of genera | - |
| tors will be when | work is completed. The power station will furnish energy | |
| to the Carpathorus | ssian area, the Ukraine, and Poland. | |

| | |
| | |
| "parabolic antennae or mirrors" which sight aircraft at a distance of 50 | X1 5X1 |
| kilometers. An important one of these centers is installed in the area of | |
| the headquarters of the military district of Lvov and is called "Lokazionaja | |
| Stancija," or Locating Station - Lvov Batja-tycze. | |
| A sizeable agglomeration of buildings and sheds is visible in the distance. | |
| Rising over everything is a large conical-shaped circular antenna | X1 |
| and other, ordinary radio antennae on wires | 7.4 |
| stretched between trellis towers. Civilian engineers work in this power sta- | .T |
| tion. They are forced to remain constantly indoors with their families and | |
| are very rarely permitted to go out, and then only for urgent and justified | |
| reasons. Workers who have worked or are working here in its construction, | |
| installation, etc., are kept here for a brief period and then split up to | |
| work in Siberia or Central Asia. | |
| Also attached to the power station is an antiaircraft artillery unit | |

Also attached to the power station is an antiaircraft artillery unit called "Abszlaziski Aparat" (services unit) [sic], concerning which no information is available.

Subordination

The power station is under the jurisdiction of the military command of the Carpathian district, the headquarters of which is in Lvov. A radar antenna under the control of the above-named command will be installed on a building next to the Lvov cathedral.
